

# FireBox 8

## FEATURES

- **The Perfect Small Kiln** for glass fusing, precious metal clay, ceramics, enameling, knife making...almost anything that you need to get hot.
- **Beginners to Advanced Artists** will love this kiln. The FireBox 8 plugs into any standard 20-amp household outlet and since it is compact in size you can fire it up almost anywhere.
- **Fast** You can always fire slower but if you need to go fast this kiln reaches glass fusing temperatures in less than 20 minutes.
- **Safe** Unlike other kilns of its size, the FireBox 8 has a hinged lid so you do not have to worry about where to put the hot lid when you want to work inside the kiln. The lid opens over 90 degrees so it is out of your way when loading or working inside the kiln. The kiln is buckled to its base so it can't slip off.

### Australian Specifications

Model	Phase	Volts	Amps	Watts	Temp °F	Cubic Feet	Opening	Depth	Wire Size	Breaker Size	NEMA Receptacle	Ship Weight
FIREBOX 8	1	115	15	1725	2000	.17	8"	4.25"	12	20	5-15	45 lbs

For more information or to find a local distributor, visit us at [skutt.com](http://skutt.com), email [skutt@skutt.com](mailto:skutt@skutt.com), or call **503-774-6000**

The FireBox 8 comes with everything you need except the shelf kit which can be purchased separately. We even supply the 9 volt battery needed for the pyrometer.

The kiln chamber is buckled to the slab so it can be removed and placed back over pre-assembled work.
