

The Scarab - Annealing Kiln

Shown with Optional Stand

The GlassMaster 33

The Scarab comes standard with the GlassMaster 33. This 4 button controller was specifically designed for frameworkers who want to anneal Borosilicate glass. You can use the pre programmed features to heat up the kiln, anneal, strike, repair and much more. It also allows you to design and store up 4 custom programs with up to 8 segments per program.

THE SCARAB - ANNEALING KILN

3 Doors with adjustable point rests designed for working with Borosilicate Glass.

The 4 button controller has programming features specifically designed for annealing Borosilicate glass.

The wood handle stays cool making it easy to operate the doors.

Operates on a 30 AMP breaker.

Easy access to components for repairs.

Solid State Relays for long life.

Main cantilevered door will stay at any position.

Independent center door allows you to work with larger diameter tubing.

Multiple handles for moving.

Designed by noted lampworking artist Marcel Braun.
