

Thermocouple Addendum

Due to the fact that our supplier of MI Cable thermocouples has gone out of business we are switching back to our original 8-Gauge Type K thermocouple. This thermocouple is very accurate, responsive and dependable.

The projected life of this new thermocouple is less than the MI cable, therefore we are giving you an extra one. The net result should be more firings before you need to order a replacement. Please disregard any reference to MI- Cable thermocouples in the manual or video.

Thank you for purchasing a Skutt Kiln!
