

STUDIO KILNS

GM1414 STUDIO SERIES

- The top and side firing elements make this unit fire very evenly and allow for glass projects to heat at a uniform rate.
- With a 13.5" chamber height this kiln is much taller than other top firing kilns allowing for tall slumping and drop mold projects.
- They are equipped standard with the GlassMaster Controller which gives you the precision and versatility needed for complicated firing projects.

FEATURES

- GlassMaster Controller
- Lid and side fired elements
- Low Mass Type K Thermocouple
- 8" stand
- Hinged control box
- Oval design
- Optional viewing window

Model	Phase	Volts	Amps	Watts	Temp °F	Cubic Feet	Opening	Depth	Wire Size	Breaker Size	NEMA Receptacle	Ship Weight
