

# Bead Kiln

BEADKILN

## GM10F BEAD KILN

■ While perfect for annealing torch work beads, this kiln is also an excellent fusing kiln for smaller projects.

■ The kiln comes standard with a side hinged door but can be ordered with the easy-to-operate bead door. Both doors come with wooden handles which are mounted away from the heat and allow you to open them without gloves.

■ Perforated sidewall baffles allow the heat to come through while protecting you from the elements.

■ The GlassMaster controller is also standard on this unit. The accurate and stable temperature provided by the controller is perfect for annealing.

■ Extremely portable and works on standard household current.

## FEATURES

- GlassMaster Controller
- Front loader design (door opens on the side)
- Optional bead door
- Works on standard household current
- Low Mass Type K thermocouple
- Protective Baffles
- Built-in stand
