

# Thank You!

Dear Kiln Owner,

Thank you for purchasing a Skutt Kiln. At Skutt we have been committed to making quality products and supporting them with the best customer service possible for over 50 years. If for any reason you feel we are not delivering on this commitment, please let us know so we can do our best to make things right.

Kilns are very safe and easy to operate pieces of equipment when you take the time to understand how they work. Even if you are an experienced kiln operator you will want to read this manual to take advantage of the many new features incorporated into the design of this latest generation of KilnMaster Kilns.

In the new KilnMasters, there are many advanced features that are designed for our technicians to access data when helping you to troubleshoot your kiln. There are also some advanced programming techniques that you may never need. If you don't quite understand them, don't worry about it. Just remember they are there if you do need them.

If at anytime you need further explanation, please feel free to contact us or your local Skutt distributor.

Again, on behalf of Skutt Kilns, thank you for buying a Skutt Kiln.

Sincerely,

Jim Skutt  
President
